Keraflo**
OUR WORLD IS WATER

Environmental Policy

Cistermiser Keraflo is committed to operating as a responsible and sustainable UK-based manufacturing company. We recognise our responsibility to minimise our environmental impact and actively work towards protecting the environment for future generations. This commitment extends across all aspects of our operations, from product design and manufacturing processes to waste management and energy consumption.

Our Environmental Principles:

1. **Compliance:** We are dedicated to complying with all relevant environmental laws, regulations, standards applicable in the United Kingdom and any other compliance obligations. We will continuously monitor changes in legislation to ensure ongoing compliance.
2. **Resource Efficiency:** We strive to develop and improve the designs of our products so they provide more efficient use of natural resources. Through providing these to customers we aim to reduce their carbon footprint by keeping materials in circulation for longer.
3. **Product Sustainability:** We are committed to producing products that prioritise sustainability and environmental responsibility. This includes the development of water-saving products that contribute to resource conservation.
4. **Pollution Prevention:** We aim to prevent pollution at its source by implementing pollution prevention practices, effective waste management, and environmentally friendly production methods.
5. **Emissions Reduction:** We will work to reduce emissions of greenhouse gases and other pollutants associated with our operations, with a focus on energy-efficient practices and the use of renewable energy sources where feasible.
6. **Continuous Improvement:** We will establish environmental performance goals and regularly review and improve our environmental management systems and processes. Employee engagement and training will be essential components of our continuous improvement efforts.
7. **Suppliers and Partners:** We aim to collaborate with our suppliers and partners to encourage sustainable practices throughout our supply chain, emphasising the importance of environmental responsibility.

Responsibility and Accountability:

All employees, regardless of their position within Cistermiser Keraflo share in the responsibility for implementing this environmental policy. Management will provide the necessary leadership, resources, and training to ensure the policy's success.

Our Environmental Officer will oversee the implementation of this policy and report directly to senior management on environmental performance and compliance. Employee suggestions and concerns regarding environmental matters are actively encouraged and will be addressed promptly.

Review and Update:

This environmental policy will be reviewed annually to ensure its relevance and effectiveness. We will also adjust our goals and objectives to reflect changes in technology, legislation, and best practices, ensuring that we remain at the forefront of environmental stewardship in the manufacturing sector.

By adhering to this environmental policy, Cistermiser Keraflo reaffirms its dedication to environmental sustainability, resource conservation, and responsible manufacturing practices. Together, we will contribute to a healthier environment for our society and future generations while serving as a model of environmental leadership within the UK manufacturing industry.
